March 15, 2007

CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

TPM 20768RPL, Log No. 03-18-008, Proctor Valley Road TPM

2. Lead agency name and address:

County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666

- 3. a. Contact: Flores Bishop, Project Manager
 - b. Phone number: (858) 495-5241
 - c. E-mail: flores.bishop@sdcounty.ca.gov.
- 4. Project location:

The project is located at 3645 Proctor Valley Road in Bonita, an unincorporated area of San Diego County. The Assessor's Parcel Number is APN 585-101-07.

Thomas Brothers Coordinates: Page 1311, Grid B/1

5. Project Applicant name and address:

Patricia Holland-Roark, 3645 Proctor Valley Road, Bonita, CA 91902

6. General Plan Designation

Community Plan: Sweetwater Land Use Designation: (1) Residential

Density: 1 du/1, 2, or 4 acre(s)

7. Zoning

Use Regulation: RR1 Rural Residential

Minimum Lot Size: 1 du/acre Special Area Regulation: None

8. Description of project:

The project proposes to subdivide 2.94 acres into two residential parcels. The project site is located at 3645 Proctor Valley Road, Bonita in the Sweetwater Community Planning Group, within unincorporated San Diego County. The site is subject to the General Plan Regional Category 1.1 Current Urban Development Area (CUDA), Land Use Designation (1) Residential. Zoning for the site is RR1. The site contains an existing residence, to remain, and associated accessory structures; two barns are to be removed. Access would be provided by a private driveways connecting to Proctor Valley Road. The project would be served by sewer provided by the Spring Valley Sanitation System and imported water from the Otay Water District. No extension of sewer or water utilities will be required by the project. Earthwork will consist of a cut volume of 200 cubic yards and a fill volume of 700 cubic yards for a net import of 500 cubic yards of material.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

The site is currently developed and/or disturbed with no native vegetation. The site has corralled horses for many years. The western portion of the site is separated from Rancho de la Nacion (an approximately 60-acre open space preserve owned by the State of California) by Proctor valley Road. There is another large block of, as yet, undeveloped land (approximately 70 acres) to the southeast of the property in the City of Chula Vista. Also, the Sweetwater Regional Park is located about a half mile at the culmination of Proctor Valley Road to the north. The rest of the surrounding land uses are residential. The topography of the project site and adjacent land ranges from gently sloping to steep. The site is located within 8,900 feet of Highway 54.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency
Parcel Map Modification	County of San Diego
Tentative Parcel Map	County of San Diego
Amendment of Conditions	
Expired Map	
Revised Map	
Time Extension	
County Right-of-Way Permits	County of San Diego
Construction Permit	
Excavation Permit	
Encroachment Permit	
Grading Permit	County of San Diego
Grading Permit Plan Change	
Improvement Plans	County of San Diego

Flores W. Bishop

Printed Name

Map Modification	County of San Diego
Air Quality Permit to Construct	Air Pollution Control District (APCD)
General Construction Storm water	RWQCB
Permit	
Waste Discharge Requirements Permit	RWQCB
Water District Approval	Otay Water District
Sewer District Approval	Spring Valley Sanitation District
Fire District Approval	Bonita-Sunnyside Fire Protection
	District

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages. □ Aesthetics ☐ Agriculture Resources ☐ Air Quality ☐ Geology & Soils ☐ Biological Resources ☐ Cultural Resources ☐ Hydrology & Water ☐ Hazards & Haz. Materials ☐ Land Use & Planning Quality ☐ Mineral Resources □ Noise ☐ Population & Housing ☐ Public Services □ Recreation ☑ Transportation/Traffic ☐ Utilities & Service ☑ Mandatory Findings of Significance <u>Systems</u> **DETERMINATION:** (To be completed by the Lead Agency) On the basis of this initial evaluation: On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. $\overline{\mathbf{A}}$ On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared. On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. March 15, 2007 Signature Date

Land Use/Environmental Planner

Title

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 4 -

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, potentially significant unless mitigation incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Potential Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Potentially Significant Unless Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

THETICS Would the project: Have a substantial adverse effect on a	scenic	vista?
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Less Than Significant Impact: Scenic vistas are singular vantage points that offer unobstructed views of valued viewsheds, including areas designated as official scenic vistas along major highways. Based on a site visit completed by Flores Bishop on October 24, 2003, the proposed project is located near or within the viewshed of a scenic vista. The viewshed and visible components of the landscape within that viewshed, including the underlying landform and overlaying landcover, establish the visual environment for the scenic vista. The visual environment of the subject scenic vista extends along Proctor Valley Road, between Otay Lakes Road and SR 94, and is a Second Priority Scenic Route. The visual composition consists of 60 acres of open space, a regional park, rural residences and urban residences (City of Chula Vista).

The proposed project is a subdivision of 2.94 acres into two residential parcels. The project is compatible with the existing visual environment's in terms of visual character and quality for the following reasons: the viewscape is mixed open space, park and residential, including urban density residential. The subdivision will result in the addition of one parcel which is of sufficient size (1.87 gross acres) to maintain the rural quality of the project site.

The project will not result in cumulative impacts on a scenic vista because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the scenic vista's viewshed and will not contribute to a cumulative impact for the following reasons: the viewscape is mixed open space, park and residential, including urban density residential. The subdivision will result in the addition of one parcel which is of sufficient size (1.87 gross acres) to maintain the rural quality of the project site.. Therefore, the project will not result in any adverse project or cumulative level effect on a scenic vista.

b)	Substantially damage scenic resou outcroppings, and historic buildings	•	, ,
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

March 15, 2007

Discussion/Explanation:

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Flores Bishop on October 24, 2003, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is at 3645 Proctor Valley Road, Bonita. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	Substantially degrade the existing surroundings?	ı visual char	acter or quality of the site and its
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as mixed open space, park and residential, including urban density residential.

The proposed project is a subdivision of 2.94 acres into two residential parcels. The project is compatible with the existing visual environment's visual character and quality for the following reasons: the viewscape is mixed open space, park and residential, including urban density residential. The subdivision will result in the addition of one parcel which is of sufficient size (1.87 gross acres) to maintain the rural quality of the project site.

The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: the viewscape is mixed open space, park and residential, including urban density residential. The subdivision will result in the addition of one parcel which is of sufficient size (1.87 gross acres) to maintain the rural quality of the project site. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

- 7 -

,	Create a new source of substantial light day or nighttime views in the area?	it or gla	re, which would adversely affect
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes a minor residential subdivision, which may include outdoor lighting. Any future outdoor lighting pursuant to this project shall be required to meet the requirements of the County of San Diego Zoning Ordinance (Section 6322-6326) and the Light Pollution Code (Section 59.101-59.115).

The project will not contribute to significant cumulative impacts on day or nighttime views because the project will conform to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

No Impact

Potentially Significant Unless

Mitigation Incorporated

a)

Less Than Significant Impact: The project site and surrounding area within radius of about 17 miles, part of a wide swath of land from the Mexican border to Lakeside, have land designated as Farmland of Local Importance. However, the proposed project was determined not to have significant adverse impacts related to the conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use for the following reasons: the existing use of the property includes horsekeeping, which can continue with the smaller parcel sizes; no other agricultural uses exist on the project site. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

<u>III. AIR QUALITY</u> -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

Conflict with or obstruct implementation of the San Diego Regional Air Quality

/	Strategy (RAQS) or applicable portions	of the	State Implementation Plan (SIP)?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	ssion/Explanation:			
anticip Opera polluta as ide not ex consis	Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria collutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.			
b)	Violate any air quality standard or contriprojected air quality violation?	bute s	substantially to an existing or	
	Potentially Significant Impact		Less than Significant Impact	

 \square

No Impact

Potentially Significant Unless

Mitigation Incorporated

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: The project proposes the subdivision of 2.94 acres into two residential parcels. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 24 Average Daily Trips (ADTs), of which 12 are existing. According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

c)	Result in a cumulatively considerable which the project region is non-attain ambient air quality standard (including quantitative thresholds for ozone presented).	nment und ng releasi	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact	\checkmark	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 24 Average Daily Trips (ADTs), of which 12 are existing. According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O_3 precursors.

d)	E	expose sensitive receptors to su	bstantial poli	utant concentrations?
[Potentially Significant Impact		Less than Significant Impact
[Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

March 15, 2007

Discussion/Explanation:

Air quality regulators typically define sensitive receptors as schools (Preschool-12th Grade), hospitals, resident care facilities, or day-care centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality.

No Impact: Based a site visit conducted by Flores Bishop on October 24, 2003, sensitive receptors have not been identified within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of the proposed project. Furthermore, no point-source emissions of air pollutants (other than vehicle emissions) are associated with the project. As such, the project will not expose sensitive populations to excessive levels of air pollutants.

e)	e) Create objectionable odors affecting a substantial number of people?			
[]		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Disc	cuss	ion/Explanation:		
No Impact: No potential sources of objectionable odors have been identified in association with the proposed project. As such, no impact from odors is anticipated.				
<u>IV.</u> a)	F C	PLOGICAL RESOURCES Would the place a substantial adverse effect, either on any species identified as a candidate ocal or regional plans, policies, or regulatish and Game or U.S. Fish and Wildlife	direct sens ations,	tly or through habitat modifications, itive, or special status species in or by the California Department of
[[Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
		· /=		

Discussion/Explanation:

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and a site visit by Megan Hamilton, staff biologist, on September 4, 2003, it has been determined that the site has been completely disturbed and contains no native vegetation or habitats. The southern portion of the site is developed, and the remainder of the site is disturbed and contains horse corrals. Therefore, no species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or

March 15, 2007

regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service would be expected to occur on-site.

b)	Have a substantial adverse effect on any natural community identified in local or rethe California Department of Fish and Ga	egiona	al plans, policies, regulations or by
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\mathbf{A}}$	No Impact
Discus	ssion/Explanation:		
conduction determined to the consection of the consection of the consection of the conduction of the c	pact: County staff, Flores Bishop, and socted site visits on October 24, 2003 and Socied that the proposed project site does we natural communities as defined by the ervation Program, County of San Diego Rounity Conservation Plan, Fish and Game Act, or any other local or regional plans, or otherwise sensitive habitat has been seed for off-site impacts resulting from road fore, the project is not expected to have comment on any riparian habitat or other seed that a substantial adverse effect on fed	Septer not co e Cour esour e Code policie ident d impr direct censitive	mber 4, 2003, respectively, and ontain any riparian habitats or other nty of San Diego Multiple Species ce Protection Ordinance, Natural e, Endangered Species Act, Clean es or regulations. In addition, no ified within or adjacent to the area rovements, utility extensions, etc. or indirect impacts from e natural community.
0)	Section 404 of the Clean Water Act (incl pool, coastal, etc.) through direct remove other means?	udinģ,	but not limited to, marsh, vernal
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

No Impact: County staff, Flores Bishop, and staff biologist, Megan Hamilton, conducted site visits on October 24, 2003 and September 4, 2003, respectively, and determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.

Mitigation Incorporated

Refer to the attached Ordinance Compliance Checklist dated December 29, 2006 for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).

V. CULTURAL RESOURCES -- Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?

	nitial Study 768RPL, Log No. 03-18-008	- 15 -	March 15, 2007	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	ion/Explanation:			
resource Diego s project s the subj CALTRA 112501 of these mile rac outbuild	No Impact : Based on an analysis of County of San Diego archaeology and historical resource files, archaeological records, maps, and aerial photographs by County of San Diego staff archaeologist, Gail Wright on June 29, 2005, it has been determined that the project site does not contain any significant historical resources. The records show that the subject parcel had been previously surveyed by Rosen (1990, No. 1121364), CALTRANS (1990, No. 1127659) and Smith (1997, No. 1127674 and 2001, No. 1125014). No historic features were identified within the current project area as a result of these previous surveys, although five historic structures were identified within a one-mile radius. Additionally, the project parcel contains a residence, barn, corral and other outbuildings and is completely disturbed by rural residential activities, resulting in a very low potential for cultural resources.			
•	Cause a substantial adverse changesource pursuant to 15064.5?	ge in the sig	nificance of an archaeological	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	ion/Explanation:			
No Impact: Based on an analysis of records and a survey of the property by a County of San Diego staff archaeologist Gail Wright on June 29, 2005, it has been determined that the project site does not contain any archaeological resources. The records show that the subject parcel had been previously surveyed by Rosen in 1990 (No. 1121364), CALTRANS in 1990 (No. 1127659) and Smith in 1997 and 2001 (No. 1127674 and No. 1125014). No archaeological features or artifacts were identified within the current project area as a result of these previous surveys, although eight sites were recorded within a one-mile radius. Additionally, the project parcel contains a residence, barn, corral and other outbuildings and is completely disturbed by rural residential activities, resulting in a very low potential for cultural resources.				
,	Directly or indirectly destroy a uniqueologic feature?	ue paleonto	ological resource or site or unique	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

No Impact: Unique Paleontological Resources - A review of the paleontological maps provided by the San Diego Museum of Natural History indicates that the project is located entirely on plutonic igneous rock and has no potential for producing fossil remains.

Unique Geologic Features – The site does not contain any unique geologic features that have been catalogued within the Conservation Element (Part X) of the County's General Plan (see Appendix G for a listing of unique geological features) or support any known geologic characteristics that have the potential to support unique geologic features. Additionally, based on a site visit by Flores Bishop on October 24, 2003, no known unique geologic features were identified on the property or in the immediate vicinity.

d)	Disturb any human remains, including the cemeteries?	nose ii	nterred outside of formal
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discu	ssion/Explanation:		
archaewill no cemet	eologist), Gail Wright, on June 29, 2005, of disturb any human remains because the tery or any archaeological resources that EOLOGY AND SOILS Would the project Expose people or structures to potential risk of loss, injury, or death involving:	it has le proj might ect: I subs	been determined that the project ect site does not include a formal toontain interred human remains. tantial adverse effects, including the
	 Rupture of a known earthquake for the area or based on other sured Refer to Division of Mines and General Referest 	oning	Map issued by the State Geologist tial evidence of a known fault?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		

No Impact: The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California, or located within any other area with substantial evidence of a known fault. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

- 17 -

i	i. Strong seismic ground shaking?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
No Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. In addition, the project will have to conform to the Seismic Requirements Chapter 16 Section 162- <i>Earthquake Design</i> as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.			
i	ii. Seismic-related ground failure, inc	cluding	g liquefaction?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The geology of the project site is identified as Eocene Marine and Nonmarine. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.

iv. Landslides?

D:	sian/Eurlanation		

No Impact: The project is not located within one-quarter mile of and existing or proposed school. Therefore, the project will not have any effect on an existing or proposed school.

No Impact: The proposed project is not within one mile of a private airstrip. As a result, the project will not constitute a safety hazard for people residing or working in the project area.

Mitigation Incorporated

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

i. OPERATIONAL AREA EMERGENCY PLAN:

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

March 15, 2007

No Impact: The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

,	Expose people or structures to a signiful wildland fires, including where wildland where residences are intermixed with the state of th	ds are a	djacent to urbanized areas or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project is adjacent to wildlands that have the potential to support wildland fires. However, the project will not expose people or structures to a significant risk of loss, injury or death involving wildland fires because the project will comply with the regulations relating to emergency access, water supply. and defensible space specified in the Consolidated Fire Code for the 17 Fire Protection Districts in San Diego County and Appendix II-A, as adopted and amended by the local fire protection district. Implementation of these fire safety standards will occur during the Tentative Map, Tentative Parcel Map, or building permit process. Also, a Fire Service Availability Letter (without conditions), dated January 9, 2006, has been received from the Bonita-Sunnyside Fire Protection District. A Fire Protection Plan, prepared by Charles S. Thomas and dated October 11, 2006 was reviewed and accepted by the County Fire Marshal in consultation with the Fire Marshal of the Bonita-Sunnyside Fire Protection District and calls for standard Fire Code conditions, such as a minimum 100-foot fuel management zone around each structure. The Fire Service Availability Letter indicates the expected emergency travel time to the project site to be four minutes. The Maximum Travel Time allowed pursuant to the County Public Facilities Element is five minutes. Therefore, based on the review of the project by County staff, through compliance with the Consolidated Fire Code and Appendix II-A and through compliance with the project's Fire Protection Plan, it is not anticipated that the project will expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires. Moreover, the project will not contribute to a cumulatively considerable impact, because all past, present and future projects in the surrounding area required to comply with the Consolidated Fire Code and Appendix II-Α.

i) Propose a use, or place residents adjacent to an existing or reasonably foreseeable use that would substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies, which are capable of transmitting significant public health diseases or nuisances?

CEQA Initi TPM 2076	ial Study 8RPL, Log No. 03-18-008	- 24 -	March 15, 2007

Discussion	n/Explanation:		
requires co applicant h (with corre	n Significant Impact: The projompliance with the Watershed Formal provided a copy of a Stormwection sheet received Septembe	Protection C water Mana er 30, 2005)	Ordinance (WPO). The project gement Plan, dated August, 2003 and prepared by K & S

requires compliance with the Watershed Protection Ordinance (WPO). The project applicant has provided a copy of a Stormwater Management Plan, dated August, 2003 (with correction sheet received September 30, 2005) and prepared by K & S Engineering, which demonstrates that the project will comply with all requirements of the WPO. The project site proposes and will be required to implement the following site design measures and/or source control BMPs and/or treatment control BMPs to reduce potential pollutants to the maximum extent practicable from entering storm water runoff: silt fences, stabilized construction entrance/exit, gravel bag barrier, street sweeping/vacuuming, stockpile/solid waste/concrete waste management, vehicle/equipment maintenance, spill prevention/control, extended detention basins, bio-filters, slope seeding/planting, mulching, landscaping, scheduling, preservation of existing vegetation, minimizing land disturbance, use of buffer strips, material delivery/storage, water conservation practices, irrigation control, and public information signage. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

- 25 -

Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.

b)	Water Act Section 303(d) list? If so, pollutant for which the water body is	could the	project result in an increase in any
[Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project lies in the 909.12/La Nacion hydrologic subarea, within the Sweetwater hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, although portions of the San Diego Bay are impaired for coliform bacteria, no portion of the Sweetwater River, which is tributary to the Bay, is impaired. Constituents of concern in the Sweetwater River watershed include coliform bacteria and trace metals.

The project proposes the following activities that are associated with these pollutants: construction activities and residential uses. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: silt fences, stabilized construction entrance/exit, gravel bag barrier, street sweeping/vacuuming, stockpile/solid waste/concrete waste management, vehicle/equipment maintenance, spill prevention/control, extended detention basins, bio-filters, slope seeding/planting, mulching, landscaping, scheduling, preservation of existing vegetation, minimizing land disturbance, use of buffer strips, material delivery/storage, water conservation practices, irrigation control, and public information signage.

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County

Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

,	Could the proposed project cause or co surface or groundwater receiving water beneficial uses?	• •
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the 909.12/La Nacion hydrologic subarea, within the Sweetwater hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; preservation of biological habitats of special significance; and rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: construction activities and residential uses. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce

potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: silt fences, stabilized construction entrance/exit, gravel bag barrier, street sweeping/vacuuming, stockpile/solid waste/concrete waste management, vehicle/equipment maintenance, spill prevention/control, extended detention basins, bio-filters, slope seeding/planting, mulching, landscaping, scheduling, preservation of existing vegetation, minimizing land disturbance, use of buffer strips, material delivery/storage, water conservation practices, irrigation control, and public information signage.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

Substantially deplete groundwater supp groundwater recharge such that there was lowering of the local groundwater table existing nearby wells would drop to a lewises or planned uses for which permits	ould le leve vel wh	be a net deficit in aquifer volume or l (e.g., the production rate of pre- nich would not support existing land
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project will obtain its water supply from the Otay Water District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.

e) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

CEQA Initial Study TPM 20768RPL, Log No. 03-18-008	- 28 -	March 15, 2007
☐ Potentially Significant Impact	\checkmark	Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The project proposes a subdivision of 2.94 acres into two residential parcels. The proposed project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in substantial erosion or siltation on- or off-site. In addition, the contributory watershed is less than 25 acres. As outlined in the Storm Water Management Plan (SWMP) dated August, 2003 with errata sheet received September 30, 2005 and prepared by K & S Engineering, the project will implement the following site design measures, source control, and/or treatment control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff: silt fences, stabilized construction entrance/exit, gravel bag barrier, street sweeping/vacuuming, stockpile/solid waste/concrete waste management, vehicle/ equipment maintenance, spill prevention/control, extended detention basins, bio-filters, slope seeding/planting, mulching, landscaping, scheduling, preservation of existing vegetation, minimizing land disturbance, use of buffer strips, material delivery/storage, water conservation practices, irrigation control, and public information signage. These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMPs that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area onor off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

f) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

	Initial Study - 0768RPL, Log No. 03-18-008	29 -	March 15, 2007

h) F	Provide substantial additional source	es of pollu	ited runoff?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: The project proposes the following potential sources of polluted runoff: construction activities and residential uses. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in runoff to the maximum extent practicable: silt fences, stabilized construction entrance/exit, gravel bag barrier, street sweeping/vacuuming, stockpile/solid waste/concrete waste management, vehicle/equipment maintenance, spill prevention/control, extended detention basins, bio-filters, slope seeding/planting, mulching, landscaping, scheduling, preservation of existing vegetation, minimizing land disturbance, use of buffer strips, material delivery/storage, water conservation practices, irrigation control, and public information signage. Refer to VIII Hydrology and Water Quality Questions a, b, c, for further information.

i)	Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map, including County Floodplain Maps?		
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Disc	ussion/Explanation:		
No Impact: No FEMA mapped floodplains, County-mapped floodplains or drainages with a watershed greater than 25 acres were identified on the project site; therefore, no impact will occur. The contributory watershed is less than 25 acres.			
j)	Place within a 100-year flood hazard are redirect flood flows?	a stru	ctures which would impede or
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Disc	ussion/Explanation:		
No Impact: No 100-year flood hazard areas were identified on the project site; therefore, no impact will occur. In addition, the contributory watershed is less than 25 acres.			
k) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?			
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

No Impact: The project site lies outside any identified special flood hazard area including a mapped dam inundation area for a major dam/reservoir within San Diego County. In addition, the project is not located immediately downstream of a minor dam that could potentially flood the property. Therefore, the project will not expose people to a significant risk of loss, injury or death involving flooding.

•	_	• • •	_	J
l)	lı	nundation by seiche, tsunami, or mudflo	w?	
		Potentially Significant Impact		Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Disc	cuss	sion/Explanation:		
i.	5	SEICHE		
	No Impact: The project site is not located along the shoreline of a lake or reservoir; therefore, could not be inundated by a seiche.			
ii.	T	TSUNAMI		
No Impact: The project site is located more than a mile from the coast; therefore, in the event of a tsunami, would not be inundated.				
iii.	N	MUDFLOW		
No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. It has been determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.				
<u>IX.</u> a)		ND USE AND PLANNING Would the Physically divide an established commun		rt:
		Potentially Significant Impact		Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

No Impact: The project does not propose the introducing new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community.

b)	Conflict with any applicable land use pla jurisdiction over the project (including, b plan, local coastal program, or zoning o avoiding or mitigating an environmental	ut not rdinan	limited to the general plan, specific ice) adopted for the purpose of
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy 1.1 Current Urban Development Area (CUDA) and General Plan Land Use Designation (1) Residential. The General Plan requires minimum gross parcel sizes of 1, 2 or 4 acres and not more than 1, 0.5, or 0.25 dwelling unit per acre. The proposed project has gross parcel sizes and density that are consistent with the General Plan. The project is subject to the policies of the Sweetwater Community Plan, with which it is consistent because it is in keeping with the semi-rural character of the community and has adequate public services. The current zone is RR1, which requires a net minimum lot size of one acre. The proposed project is consistent with the Zoning Ordinance requirements for minimum lot size.

X. MINERAL RESOURCES -- Would the project:

a)	Result in the loss of availability of a value to the region and the residen		
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3. The project will not result in a loss of availability of a known significant mineral resource that would be of value to the region. The project is not located in a significant mineral resource area, as identified on maps prepared by the Department of Conservation. Also, on a site visit

March 15, 2007

conducted by Megan Hamilton on September 4, 2003, no past or present mining activities were identified on the project. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.

b)	Result in the loss of availability of a local site delineated on a local general plan,			
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discu	ussion/Explanation:			
Use 2	No Impact: The project site is zoned RR1, which is not considered to be an Extractive Use Zone (S82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).			
Therefore, no potentially significant loss of availability of a known mineral resource of locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan will occur as a result of this project.				
XI. N a)	IOISE Would the project result in: Exposure of persons to or generation of established in the local general plan or of other agencies?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less Than Significant Impact: The project is a minor residential subdivision and will be occupied by residents. Based on a site visit completed by Flores Bishop on October 24, 2003, the surrounding area supports residences and is occupied by residents. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours). Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance - Section 36-404

Non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned RR1 that has a one-hour average sound limit of 50 dB(A) from 7:00 a.m. to 10:00 p.m. and 45 dB(A) from 10:00 p.m. to 7:00 a.m. The adjacent properties are zoned RR1, RS4, and S88 and have the same one-hour average sound limits. Based on review by staff, the project's noise levels are not anticipated to impact adjoining properties or exceed County Noise Standards, which is 47.5 dB(A), because the project does not involve any noise producing equipment that would exceed applicable noise levels at the adjoining property line.

Noise Ordinance – Section 36-410

The project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, It is not anticipated that the project will operate construction equipment in excess of an average sound level of 75dB between the hours of 7 AM and 7 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
Less T	han Significant Impact: The project	t involve	s the following permanent noise

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: construction activities. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels

increase in the ambient noise level.

d)

based on review of the project by County staff. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

A substantial temporary or periodic increase in ambient noise levels in the project

- 36 -

, v	vicinity above levels existing without the project?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		
Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots transfer stations or delivery areas; or outdoor sound systems. Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.			
, 1	For a project located within an airport lar not been adopted, within two miles of a p the project expose people residing or wo noise levels?	oublic	airport or public use airport, would
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

,	For a project within the vicinity of a private people residing or working in the project

	. Police protection? i. Schools? v. Parks?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: Otay Water District, Spring Valley Sanitation District, Bonita-Sunnyside Fire Protection District, and Chula Vista Elementary and Sweetwater Union High school districts. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

,	Would the project increase the use of e or other recreational facilities such that facility would occur or be accelerated?	substa	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay fees. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

Does the project include recreational facilities or require the construction or

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

b)

Less Than Significant: There are no direct impacts associated with this project. The proposed project will result in an additional 12 ADT (per SANDAG traffic rates 1 lots times 12 ADT per lot = 12 ADT); there are also 12 ADT existing. The project was reviewed by DPW and was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: Currently there is

approximately 2000 ADT on Proctor Valley Road. The existing level of service on Proctor Valley Road is better than "C". The level of service with the project will be better than level of service "C". The increase of 12 ADT will not be a substantial increase.

Given the County's traffic thresholds of 200 ADT on a road operating at LOS E and 100 ADT on a road operating at LOS F, there would be no direct impacts to a road segment. Using SANDAG's estimate for AM and PM peak hour trips the project would generate less than five peak hour trips and will not exceed the five additional trips to a critical move threshold - especially when the trips are distributed on the road network. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system.

Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system. Also refer to the answer for XV. b. below.

, ∈ b	exceed, either individually or cumulate stablished by the County congestion by the County of San Diego Transport oads or highways?	n manage	ement agency and/or as identified
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Potentially Significant Impact Unless Mitigation Incorporated: The proposed project will result in an additional 12 ADT; there are also 12 ADT existing. The project was reviewed by DPW and was determined not to exceed a level of service (LOS) standard at the direct project level for the following reasons: The existing level of service on Proctor Valley Road is better than "C". The level of service with the project will be better than level of service "C". The increase of 12 ADT will not be a substantial increase. Therefore, the project will not have a significant direct project-level impact on the LOS standards established by the County congestion management agency for designated roads or highways.

However, the County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. This program is based on a summary of projections method contained in an adopted planning document, as referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts.

Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 24 ADT, of which 12 are existing. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

For projects that will require building permits-

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will pay the TIF prior to obtaining building permits.

For projects that will not require building permits-

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will be conditioned pay the TIF prior to Final Map (or Use and Reliance on the Permit).

c)	Result in a change in air levels or a change in loc	•	uding either an increase in traffic substantial safety risks?

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal, State, and local statutes and regulations related to solid waste.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

Does the project have the potential to c substantially reduce the habitat of a fisl wildlife population to drop below self-su plant or animal community, substantiall of a rare or endangered plant or anima major periods of California history or pr	n or wi ıstainir y redu l or elir	Idlife species, cause a fish or ng levels, threaten to eliminate a ce the number or restrict the range minate important examples of the
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no substantial evidence that there are biological or cultural resources that are affected or associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

Potentially Significant Impact

Potentially Significant Unless

Mitigation Incorporated

Less than Significant Impact

No Impact

Discussion/Explanation:	

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER
Stivers	TM 4927RPLTE
Mausen Large Family Daycare	AD 99-008
Ames Ranch	TM 5205, P00-009, P00-009-02,
	P00-009-03, TPM 20984
Barona Casino	P01-012, P01-012-01
Madrid Ranch Estate	TM 5363
Haro Second Dwelling	ZAP 04-010
Hughes Family Trust TPM	TPM 20852
Rancho De San Miguel	TM 5432

Potentially Significant Unless Mitigation Incorporated: Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in Sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee when building permits are pulled. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?				
[☐ ☑	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

- 49 -

Potentially Significant Unless Mitigation Incorporated: In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to traffic. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee when building permits are pulled. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
